Intro to Creative Computing  
Project #8: Typography Art  
20171672 Jung Won Lee

# # Target Users

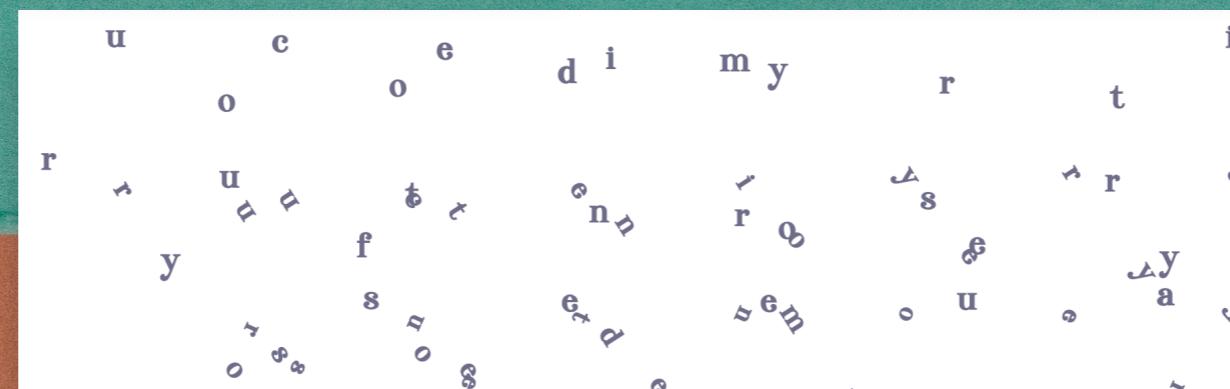

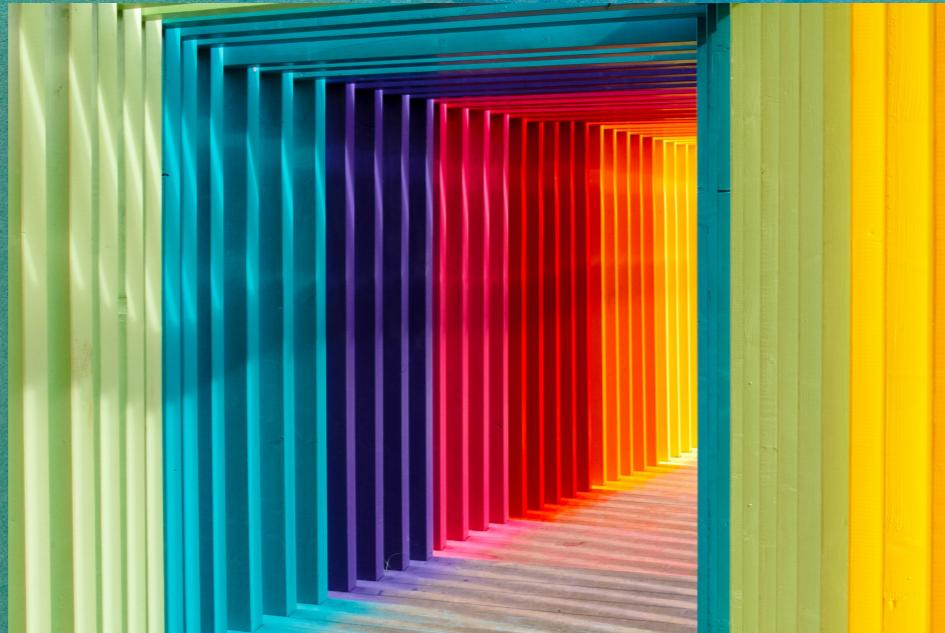

Anyone who likes typography art.

# # Features

The app will show you flying alphabets and the color of them will be changed as the time goes.  
You can press your left-mouse button to make your own typography, own color, own moment, own world….

# # Visual Concept

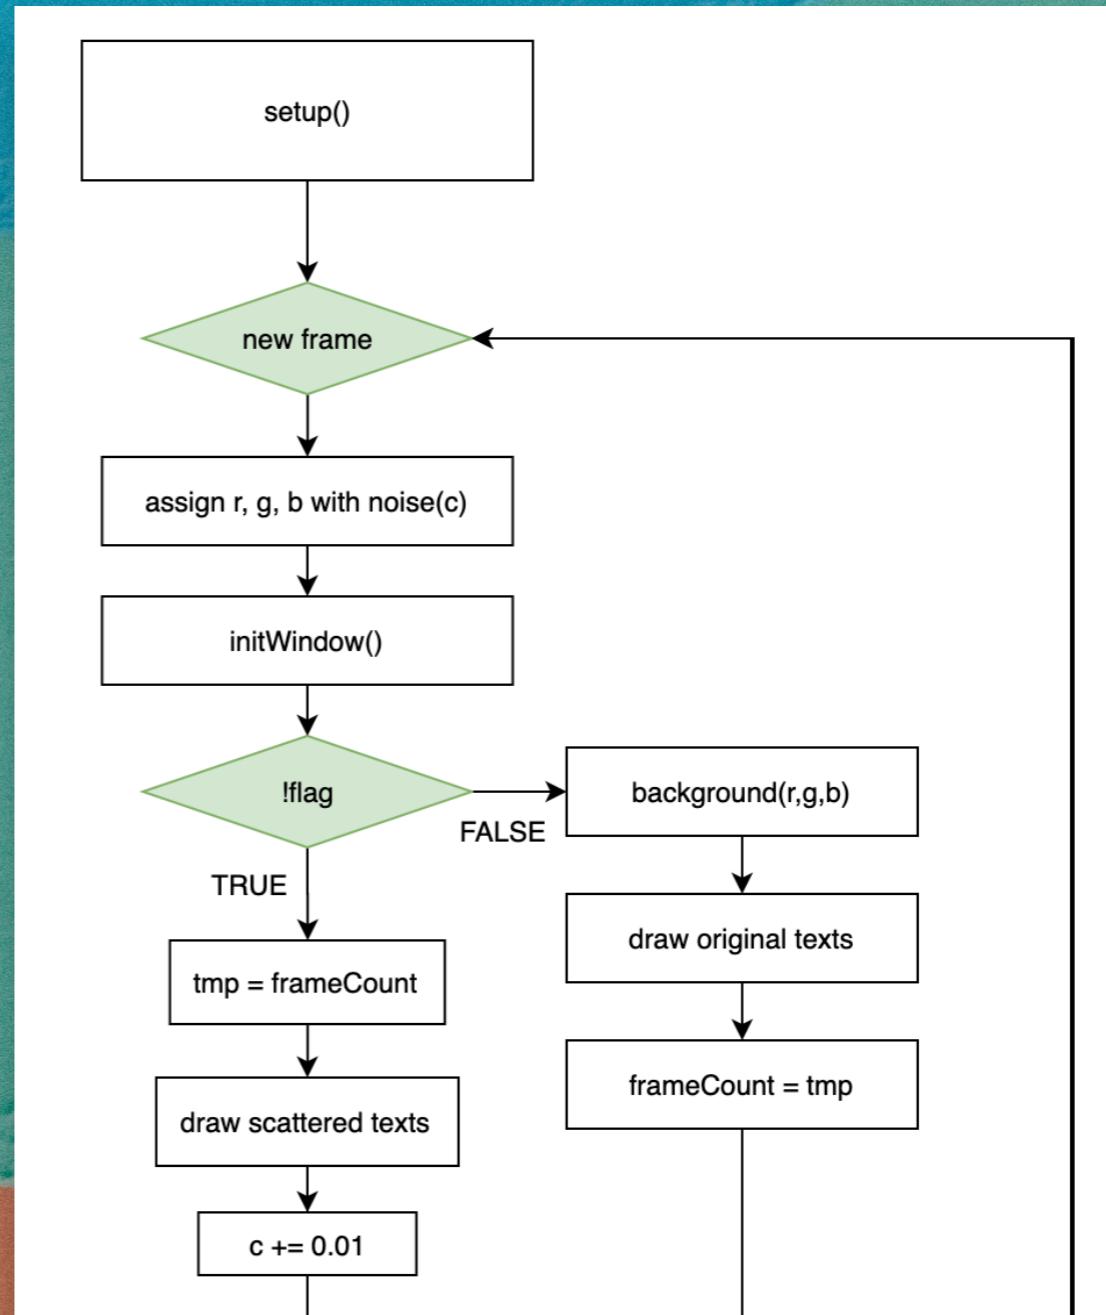

The message “Your Focus Determines Your Reality” is a famous quote from the movie ‘Star Wars episode 1’ .  
It means you can make your own world or path with your own will.  
There are so many worlds and paths in the world, and they exist everywhere in various colors.  
With your own will, you can determine your own world with unique color, which means you can determine your reality.

# # Algorithms

```
setup()  
  
if (new frame)  
    assign r, g, b  
    initWindow()  
    if(!Flag)  
        tmp = frameCount  
        draw scattered texts  
        c += 0.01  
    Else  
        background(r,g,b)  
        draw original texts  
        frameCount = tmp
```

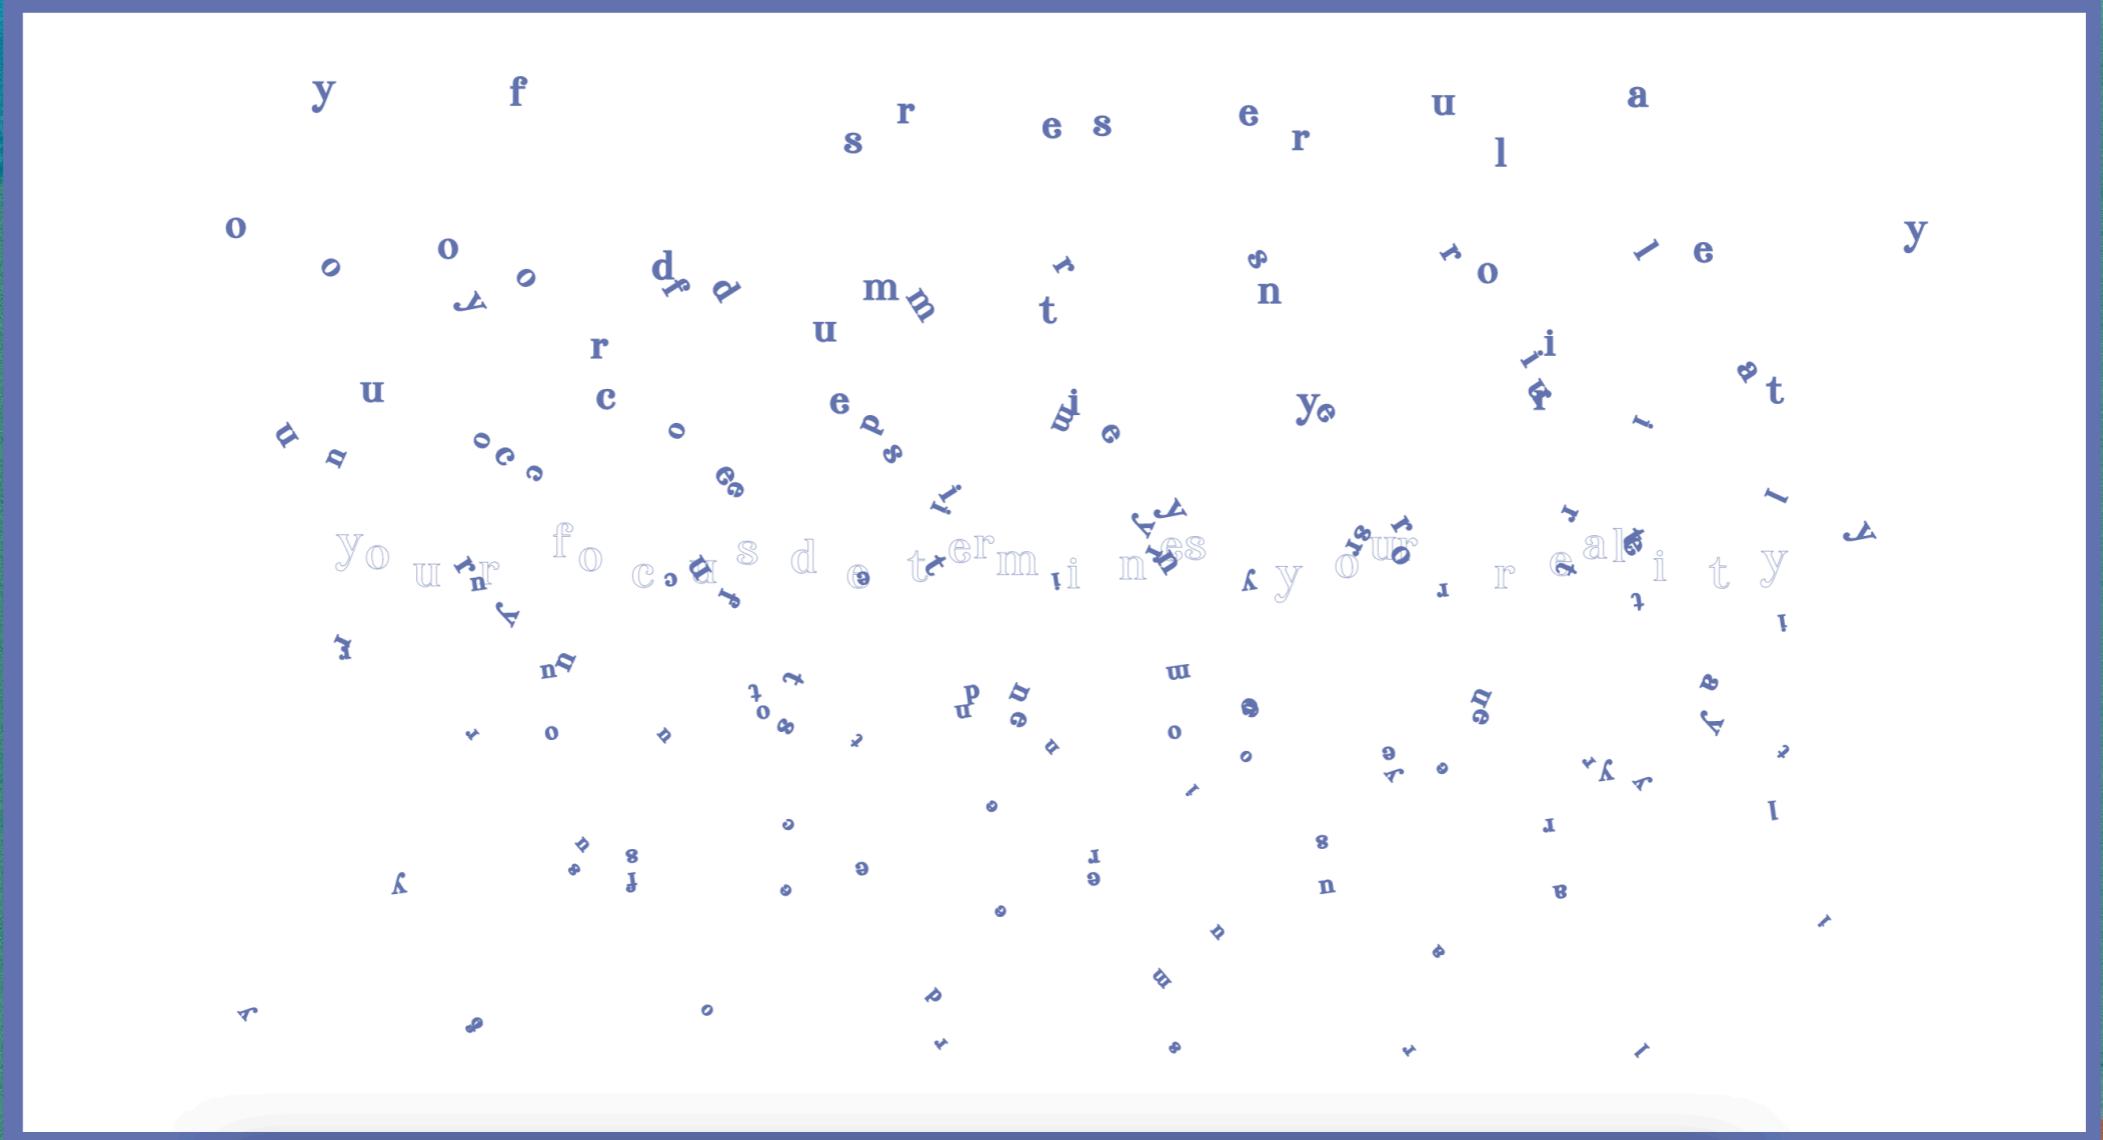

# # Screenshots

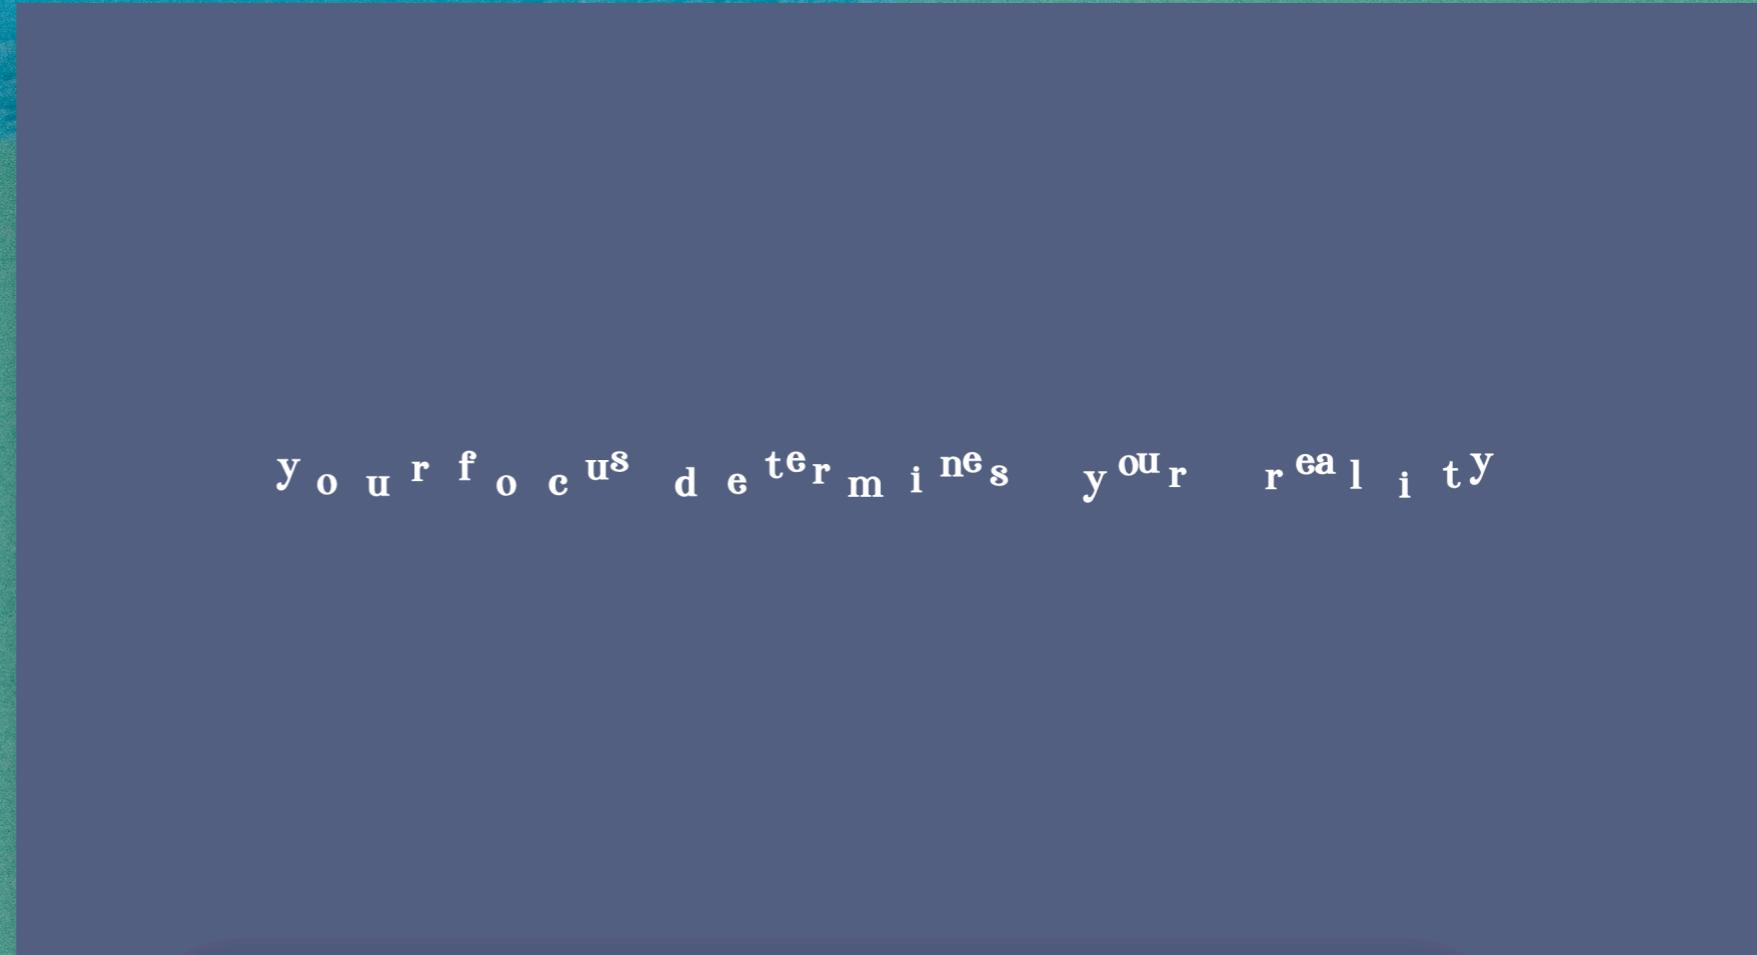

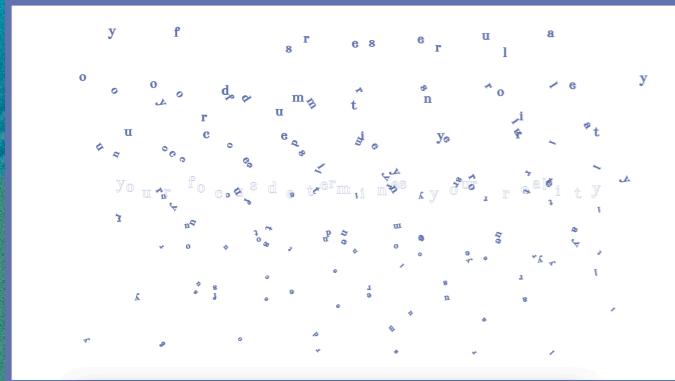

First, the window will show the default page.  
The alphabets are filling around the window.

# # Screenshots

The color of the texts and frame will be changed as the time goes.  
Also, the message has only the stroke, not filled with the color.

# # Screenshots

If you press left-mouse button, the flying alphabets will disappear.  
And the message will appear with the background color of the moment you pressed.

## # Web Link

A landscape photograph of a beach. The top half of the image shows the ocean with gentle waves and a clear blue sky. The bottom half shows a sandy beach with a distinct orange-red hue. The two colors meet at a sharp, straight horizontal line.

*Thank You!*
